I. PERFECT MEASUREMENTS EVERYTIME

The technology used for the differentiation of WBC and reticulocytes improves sensitivity in the detection of WBC abnormalities and decreases interferences ensuring high result accuracy and precision.

2. CUSTOMIZED SOLUTIONS

The optional autosampler with its continuous loading capability makes the Aquarius 5_{retic} a true walk-away system, ensuring timely clinical decisions in both the human and veterinary markets.

3. SMART REAGENT PACK FOR COST CONTAINMENT

A closed reagent pack for CBC DIFF and reticulocytes features low reagent consumption (<30ml), improved ease of use and better inventory control.
